Dosen: Lukman Hakim, S.Kom., M.Kom.

A. KALIMAT DESKRIPTIF

- Mulai
- Input Alas, Tinggi
- Hitung Luas = ((Alas * Tinggi) / 2)
- Cetak Luas
- Selesai

B. FLOWCHART

C. PSEUDOCODE

```
Input:
```

Alas, Tinggi: real

Output:

Luas : real

Read (Alas)

Read (Tinggi)

Luas = ((Alas * Tinggi) / 2)

Write (Luas)

D. PROGRAM

Cara 01.

```
public class LuasSegitiga_CO1 {
   public static void main(String[] args) {
     int alas = 2;
     int tinggi - 3;
     double luas;

     luas - ((alas * tinggi/2);
     System.cut.println("-mas Segitige = " +luas);
}
```

Dosen: Lukman Hakim, S.Kom., M.Kom.

-----Cara 02.

```
package Permasalahan02;
public class LuasSeqitiqa_CU2 (
    static double luasSegitiga(int alas, int tinggi){
        double luas - ((alas * tinggi)/2);
        return luas;
    1
    public static void main (String [] args) [
        int alas = 2:
        int tinggi = 3;
       System.out.println("Laas Persegi :"+luasSegitiga(alas, tinggi));
    }
```

Cara 03.

```
package Permasalahan02;
import java.util.Scanner;
public class LmasSegitiga_CO3 {
   public static void main(String[] args) {
        int alas;
        int tinggi;
        double luas;
        Scanner scan = new Scanner (System.in):
        System.out.print("Masukan Alas: ");
        alas = scan.nextInt();
        System.out.print("Masukan Tinggi: "):
        tinggi - scan.nextInt();
       luas = ((alas * tinggi)/2);
        System.out.println("Luas Segitiga = " (luas);
1
```

Dosen: Lukman Hakim, S.Kom., M.Kom.

Cara 04.

package Permasalahan02;
import [ava.io.BufferedReader;
import [ava.io.IoException;
import [ava.io.InputStreamReader;

public class LuasSegiLiga_C04 {
 public static void main(String[] args) throws IoException{
 BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
 int slas, singui;
 double luas;

 System.out.print("Inputken Nilai Rlas :");
 alas=Integer.parseInt(br.readLine());

 System.out.print("Inputken Nilai Tingqi :");
 tinggi=Integer.parseInt(br.readLine());

 luas = ((alas * tinggi)/2);
 System.out.println("Luas : "(luas);
]
}
